

# BOT 208

## Heavy duty drainage pump for clean and dirty water

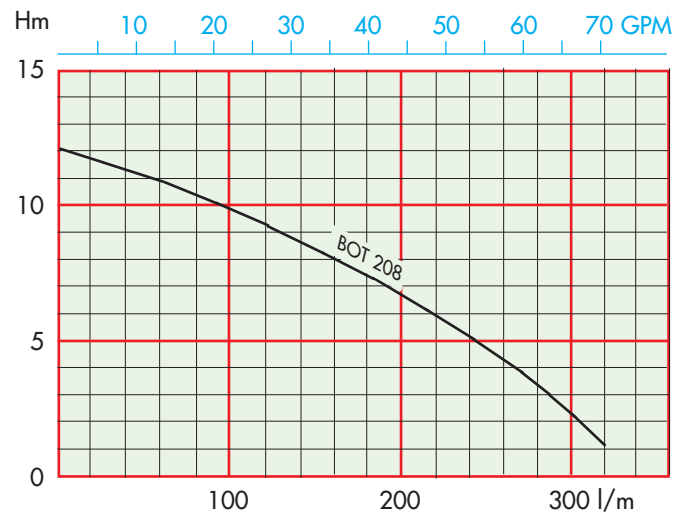

This 110/1/50 submersible site pump features high chrome alloy steel vortex impeller, designed for arduous drainage type applications. 6mm dia. suction grid. The motor frame, casing and strainer are made of stainless steel and inner cable wires and cable base are epoxy filled to raise humidity resistance. A built-in motor overload protector is also supplied. Pumps feature a dual SIC/SIC mechanical seal arrangement plus oil seal for long service life. Internal capacitor 50 $\mu$ F. 10m H07RN-F cable. 2" BSP female/2" hoesetail discharge.

OVERLOAD PROTECTOR

*Built-in overload protector with auto re-start facility.*
